

Name: **Da’Nice Green**  
Position: **President**

### **Candidate Bio**

My name is Da’Nice (Danniece) Green and I was Born & raised in Brooklyn, NY. Back in 2006, I attended NCCU, as a freshman and decided to discontinue my college dreams to follow my now husband, to Germany, for his military career. Over 11 years later, married with three beautiful children, I decided to come back to NCCU and finish what I started. As of December

2021 I became an official, NCCU alumni. I am currently running for president of the alumni association because I want to be a part of an organization that help me to believe that, it’s never too late to complete your goals. I want to be able to exemplify a HBCU that literally molded my adulthood and is partly responsible for the woman I am today.

### **What does Truth & Service mean to you?**

When I think about truth and service, the first thing that comes to mind is service learning opportunities. Providing information about a particular need in the community to students, all while learning how to give back and educate themselves on the particular need. In hindsight you can help an individual that requires help, but if you don’t know the basis of the topic and how to affectively supply you’re educated abilities, then it does more harm than good, for the person receiving the service. It is important to instill that practice into students as they go throughout life.

### **What are three goals you have for the position you are seeking?**

My three goals that I have, if I’m chosen for the position as the president of the alumni Association will be geared towards scholarships, networking and career opportunities. I know as a freshman, I struggled and I had to hustle in order to understand what it meant to survive with little to nothing. As an alumni and my

personal connections with Always give them back to my community, I would love to present the opportunity to our fellow eagles through scholarships and helping them network with other alumni's, in order to obtain career opportunities for the future.
